

SELSIUS 3 WAY ORWELL FILTER TAP

The Selsius 3 Way Orwell taps are ideal for use in a kitchen. This taps may also be more convenient for the newer and increasingly popular dual sink configurations many people are now opting for. The Selsius 3 Way Orwell tap connects to your existing hot and cold water feed to provide regular mains water at your sink which also has a seperately run feed which dispenses filtered water. This alleviates the need to have a seperate drinking water tap. Filtered water cannot mix with your normal hot and cold water as there is a separate channel and outlet in the spout. Undersink Chiller Optional to give you chilled filtered water
